

General Specifications

Top: Top is 1-1/4" thick, three ply engineered panel construction with a .050" high pressure laminate worksurface, 1-1/8" industrial particle board core, and a phenolic backer/balance sheet.

Legs: Table consists of two 22" wide T Base legs. Each leg assembly includes a 2" diameter 14 gauge steel tubing on vertical, which is welded to a 4"W x 10"L x 1/4" thick steel plate. Vertical column is also welded (concealed weldment) to a 1/4" thick laser cut horizontal main bar. Main bar has a slight angle on outside of leg and the inside has a rounded shape to mimic the vertical post. The out of the mainbar receives a 1/4" thick round cap that is through mounted via mainbar. Under the main bar is a welded 3/4" diameter steel post equipped with a leveling glide. A 1/4" thick plate is TIG welded to the 3/4" diameter steel posts and the horizontal mainbar for structural integrity.

Folding Base Mechanism: A nylon injection molded body with an extruded aluminum mechanism is bolted to the leg frame via a threaded insert. Mechanism is attached to the underside of work surface using 1" #12 wood screws.

Flip Top Mechanism: Two-part steel mechanism is joined via a pivot system. Upper component attaches to underside of work surface using 1" #12 wood screws. Lower component bolts to leg frame via a threaded insert.

Finish: See **mtcontract** Finish and Color Guide for choices.

ECLIPSE X-BASE

Tables

General Specifications

Top: Top is 1-1/4" thick, three ply engineered panel construction with a .050" high pressure laminate worksurface, 1-1/8" industrial particle board core, and a phenolic backer/balance sheet.

Base: Table base consists of single-column or four-column X-base. The base assembly includes 2" diameter 14 gauge steel tubing on vertical, which is welded to a 8"W x 8"L x 1/4" thick steel plate. Vertical column is also welded (concealed weldment) to two 1/4" thick laser cut horizontal main bars stacked at right angles to one another forming an X. Main bars taper in at a slight angle from the rounded shape that mimics the vertical post to each of the four ends. The out of the mainbars receives a 1/4" thick round cap that is through mounted via mainbar. Under the main bars is a welded 3/4" diameter steel post equipped with a leveling glide. A 1/4" thick plate is TIG welded to the 3/4" diameter steel posts and the X mainbars for structural integrity.

Flip Top Mechanism: Two-part steel mechanism is joined via a pivot system. Upper component attaches to underside of work surface using 1" #12 wood screws. Lower component bolts to leg frame via a threaded insert.

Finish: See mtcontract Finish and Color Guide for choices.
